Shrimps in small quantities were to be had yesterday, but were all picked up before the usual hour for closing. Neither crabs nor lobsters have been seen for several days, but a shipment of the former is expected the first of the week. Halibut is also scarce, but the scarcity is looked upon as only temporary.

Mushrooms were seen at a few of the stores along Market row, but did not last long, even at 20 cents a pound. Dealers all along the row did the usual big Saturday business, but there was little or no change in either the prices or offerings.

Ture of the official sintement of the New York Associated banks last week was the remarkably close correspondence between the cash gain as reported in the statement and the net loss which was estimated upon the basis of the traceable movements of money during the week. The net gain of cash by the banks was \$29,100, while the estimated increase was \$11,700. Considering the fact that the statement must have included the withdrawal from the banks of \$2,00,000 on Priday for shipment to Paris, which would count for one day, or about \$320,000 in the averages, and that the estimates included only the withdrawal of \$1,50,000 on Wednesday for export on Thursday, an average of about \$600,000, the slight discrepancy between the estimated loss and the actual gain may be easily accounted for.

"The most significant fact shown both by the statement and the estimates, however, is that the movement of money to the interior for crop purposes has not only greatly diminished in volume, but that there are almost unmistakable indications of a turn hither in the monetary tide.

"Though the statement was made on declining averages for cash, owing to the bringing over into this week of \$2,250,000

"Though the statement was made on de-clining averages for eash, owing to the bringing over into this week of \$2,250,000 gold which was withdrawn for export on Wednesday and on Friday, this fact is not important, for there will doubtless be re-ceived on Monday about \$500,000 Japaness gold which arrived at San Francisco on Saturday; moreover, the turn in the hi-terior monetary tide will most likely cause withdrawals hereafter of gold for export, to be offset by receipts of currency from the country."
